

Statement on Monetary Policy

1. At the Monetary Policy Meeting held today, the Policy Board of the Bank of Japan decided, by a unanimous vote, to set the following guideline for money market operations for the intermeeting period:

The Bank of Japan will conduct money market operations so that the monetary base will increase at an annual pace of about 60-70 trillion yen.

2. With regard to the asset purchases, the Bank will continue with the following guidelines:
 - a) The Bank will purchase Japanese government bonds (JGBs) so that their amount outstanding will increase at an annual pace of about 50 trillion yen, and the average remaining maturity of the Bank's JGB purchases will be about seven years.
 - b) The Bank will purchase exchange-traded funds (ETFs) and Japan real estate investment trusts (J-REITs) so that their amounts outstanding will increase at an annual pace of about 1 trillion yen and about 30 billion yen respectively.
 - c) As for CP and corporate bonds, the Bank will continue with those asset purchases until their amounts outstanding reach 2.2 trillion yen and 3.2 trillion yen respectively by end-2013; thereafter, it will maintain those amounts outstanding.
3. Japan's economy is starting to recover moderately. As for overseas economies, while the manufacturing sector continues to show a lackluster performance, they are gradually heading toward a pick-up as a whole. In this situation, exports have been picking up. Business fixed investment has stopped weakening and shown some signs of picking up as corporate profits have improved. Public investment has continued to increase, and the pick-up in housing investment has become evident. Private consumption has remained resilient, assisted by the improvement in consumer sentiment. Reflecting these developments in demand both at home and abroad, industrial production is increasing moderately. Business sentiment has been improving. Meanwhile, financial conditions are accommodative. On the price front, the year-on-year rate of change in the consumer price index (CPI, all items

less fresh food) is currently 0 percent. Some indicators suggest a rise in inflation expectations.

4. With regard to the outlook, Japan's economy is expected to recover moderately on the back of the resilience in domestic demand and the pick-up in overseas economies. The year-on-year rate of change in the CPI is likely to turn positive.
5. Compared with the forecasts presented in the April 2013 *Outlook for Economic Activity and Prices*, the growth rate and year-on-year rate of change in the CPI will likely be broadly in line with the April forecasts.
6. Regarding risks, there remains a high degree of uncertainty concerning Japan's economy, including the prospects for the European debt problem, developments in the emerging and commodity-exporting economies, and the pace of recovery in the U.S. economy.
7. The Bank will continue with quantitative and qualitative monetary easing, aiming to achieve the price stability target of 2 percent, as long as it is necessary for maintaining that target in a stable manner. It will examine both upside and downside risks to economic activity and prices, and make adjustments as appropriate.^[Note]

Such conduct of monetary policy will support the positive movements in economic activity and financial markets, contribute to a rise in inflation expectations, and lead Japan's economy to overcome the deflation that has lasted for nearly 15 years.

^[Note] Mr. T. Kiuchi proposed that the Bank will aim to achieve the price stability target of 2 percent in the medium to long term and designate quantitative and qualitative monetary easing as an intensive measure with a time frame of about two years. The proposal was defeated by an 8-1 majority vote. Voting for the proposal: Mr. T. Kiuchi. Voting against the proposal: Mr. H. Kuroda, Mr. K. Iwata, Mr. H. Nakaso, Mr. R. Miyao, Mr. Y. Morimoto, Ms. S. Shirai, Mr. K. Ishida, and Mr. T. Sato.

Forecasts of the Majority of Policy Board Members

y/y % chg.

	Real GDP	CPI (all items less fresh food)	Excluding the effects of the consumption tax hikes
Fiscal 2013	+2.5 to +3.0 [+2.8]	+0.5 to +0.8 [+0.6]	/
Forecasts made in April 2013	+2.4 to +3.0 [+2.9]	+0.4 to +0.8 [+0.7]	
Fiscal 2014	+0.8 to +1.5 [+1.3]	+2.7 to +3.6 [+3.3]	+0.7 to +1.6 [+1.3]
Forecasts made in April 2013	+1.0 to +1.5 [+1.4]	+2.7 to +3.6 [+3.4]	+0.7 to +1.6 [+1.4]
Fiscal 2015	+1.3 to +1.9 [+1.5]	+1.6 to +2.9 [+2.6]	+0.9 to +2.2 [+1.9]
Forecasts made in April 2013	+1.4 to +1.9 [+1.6]	+1.6 to +2.9 [+2.6]	+0.9 to +2.2 [+1.9]

Notes: 1. Figures in brackets indicate the median of the Policy Board members' forecasts (point estimates).

- The forecasts of the majority of the Policy Board members are constructed as follows: each Policy Board member's forecast takes the form of a point estimate -- namely, the figure to which he or she attaches the highest probability of realization. These forecasts are then shown as a range, with the highest figure and the lowest figure excluded. The range does not indicate the forecast errors.
- Individual Policy Board members make their forecasts assuming the effects of past policy decisions and with reference to views incorporated in financial markets regarding future policy.
- The scheduled consumption tax hikes for April 2014 and October 2015 -- to 8 percent and 10 percent, respectively -- are incorporated in the forecasts. In terms of the outlook for the CPI, individual Policy Board members make their forecasts based on figures excluding the direct effects of the consumption tax hikes.
- The forecasts for the CPI for fiscal 2014 and fiscal 2015 that incorporate the direct effects of the consumption tax hikes are constructed as follows. First, the contribution to prices from each tax hike is mechanically computed on the assumption that the tax increase will be fully passed on for all taxable items. The CPI for fiscal 2014 and fiscal 2015 will be pushed up by 2.0 percentage points and 0.7 percentage point, respectively. Second, these figures are added to the forecasts made by the Policy Board members.
- The ranges shown below include the forecasts of all Policy Board members.

y/y % chg.

	Real GDP	CPI (all items less fresh food)	Excluding the effects of the consumption tax hikes
Fiscal 2013	+2.3 to +3.0	+0.4 to +1.0	/
Forecasts made in April 2013	+2.1 to +3.1	+0.4 to +1.0	
Fiscal 2014	+0.4 to +1.5	+2.6 to +3.7	+0.6 to +1.7
Forecasts made in April 2013	+0.6 to +1.7	+2.6 to +3.7	+0.6 to +1.7
Fiscal 2015	+1.2 to +2.1	+1.4 to +3.0	+0.7 to +2.3
Forecasts made in April 2013	+1.3 to +2.1	+1.5 to +3.0	+0.8 to +2.3

Forecast Distribution Charts of Policy Board Members

(1) Real GDP

(2) CPI (All Items Less Fresh Food)

Notes: 1. Based on the aggregated probability distributions (i.e., the Risk Balance Charts) compiled from the distributions of individual Policy Board members, the Forecast Distribution Charts are compiled as follows. First, upper and lower 10 percentiles of the aggregated distributions are trimmed and second, colors indicated below are used to show the respective percentiles of those distributions.

Upper 40% to lower 40%	Upper 30 to 40% & lower 30 to 40%	Upper 20 to 30% & lower 20 to 30%	Upper 10 to 20% & lower 10 to 20%
------------------------	-----------------------------------	-----------------------------------	-----------------------------------

2. For the process of compilation of the Risk Balance Charts, see the box on page 9 of the April 2008 *Outlook for Economic Activity and Prices*.
3. The circles in the bar charts indicate the median of the Policy Board members' forecasts (point estimates). The vertical lines in the bar charts indicate the range of the forecasts of the majority of Policy Board members.
4. The forecast for the CPI excludes the direct effects of the scheduled consumption tax hikes.
