

### **[III] The Committee's Commitment to External Communication**

#### **1. The Committee's Communication Engagements since the Sixth Meeting**

Since the sixth meeting held on April 24, 2019, the Committee has been making various efforts to raise awareness of the Committee's activities such as the Committee's chair and persons involved in the Committee appearing as a speaker and panelists in the seminar hosted by QUICK and releasing documents distributed to the Committee's participants on the Bank of Japan's website.

#### **2. Way Forward**

As the Committee intends to conduct a public consultation in around this month, the Committee will make further efforts to facilitate awareness of the Committee's work on benchmark reform including the risk relating to the permanent discontinuation of JPY LIBOR and the future public consultation.
