Notes to the stock table:

- (1) The amount outstanding of JGBs in the assets on the Bank's balance sheet. The figure for April 2001 is calculated by adding the amount outstanding of sales of JGBs to the government under repurchase agreements conducted in or before March 2001 to the amount outstanding of JGBs. JGBs held by the Bank are revalued at the end of the first half of every fiscal year and of the entire fiscal year. Until fiscal 2003, the value was stated at the lower of cost, determined by the moving-average method, or market value. From fiscal 2004, the value is stated at amortized cost, determined by the moving-average method. There is no continuity between figures through March 2001 and those from April 2001 due to changes in the Bank's accounting practice in April 2001 for transactions of government securities under repurchase agreements.
- (2) The amount outstanding of JGBs purchased or acquired outright from financial institutions, including those rolled over at maturity and underwritten by the Bank. Calculated by subtracting the amount outstanding of government compensation bonds and other JGBs from that of JGBs held by the Bank. Figures approximately equal the accumulated amount of JGBs purchased or acquired outright from financial institutions minus the sum of redemptions, treasury bills (TBs) issued to roll over matured JGBs and underwritten by the Bank, and sales to the Government Debt Consolidation Fund.
- (3) The amount outstanding of government compensation bonds and other JGBs. Stated at face value.
- (4) The amount outstanding of JGBs sold to the government under repurchase agreements. Stated at sales-proceeds value.
- (5) The amount outstanding of treasury discount bills (consisting of TBs and financing bills [FBs]) in the assets on the Bank's balance sheet. Figures for April and May 2001 are calculated by subtracting the amount outstanding of purchases of TBs and FBs under repurchase agreements conducted in or before March 2001 from that of treasury discount bills. The amount does not match the sum of the detailed items because of the difference in valuation. Treasury discount bills held by the Bank are revalued at the end of the first half of every fiscal year and of the entire fiscal year. Until fiscal 2003, the value was stated at cost determined by the moving-average method. From fiscal 2004, the value is stated at amortized cost, determined by the moving-average method. There is no continuity between figures through March 2001 and those from April 2001 due to changes in the Bank's accounting practice in April 2001 for transactions of government securities under repurchase agreements.
- (6) The amount outstanding of FBs underwritten by the Bank and TBs issued to roll over JGBs and TBs and underwritten by the Bank. Figures equal the accumulated amount of these treasury discount bills, subtracting their redemption. Stated at face value.
- (7) The amount outstanding of treasury discount bills purchased from financial institutions. Figures equal the accumulated amount of these treasury discount bills, subtracting principally their redemptions including those redeemed before maturity. Stated at acquisition cost.
- (8) The amount outstanding of treasury discount bills sold to financial institutions. Figures equal the accumulated amount of these treasury discount bills, subtracting their redemption. Stated at sales-proceeds value.
- (9) The amount outstanding of net sales of treasury discount bills to the government and others (i.e., the difference between the amount of treasury discount bills sold to and purchased from the government and others). Redeemed treasury discount bills are excluded. Stated at face value.
- (10) The amount outstanding of treasury discount bills sold to foreign central banks and others under repurchase agreements. Stated at face value.
- (11) The amount outstanding of JGSs (JGBs and treasury discount bills) purchased from financial institutions under repurchase agreements. Stated at acquisition cost. The amount outstanding through October 2002 is that of JGBs purchased from financial institutions under repurchase agreements, and thus there is no continuity between figures through October 2002 and those from November 2002.
- (12) The amount outstanding of JGSs sold to financial institutions under repurchase agreements. Stated at sales-proceeds value.
- (13) The amount outstanding of loans to financial institutions provided by funds-supplying operations against pooled collateral (loans that are made against pooled eligible collateral by way of open market operations with loan rates determined by multiple-rate competitive auctions or at a fixed rate determined by the Bank in advance).
- (14) The amount outstanding of CP, dematerialized CP issued by domestic corporations, dematerialized CP issued by foreign corporations with guarantees, government-guaranteed dematerialized CP, dematerialized asset-backed CP, and dematerialized CP issued by real estate investment corporations purchased from financial institutions under repurchase agreements. Stated at face value.

- (16) The amount outstanding of loans to financial institutions in disaster areas with regard to the Great East Japan Earthquake provided by the funds-supplying operation to support financial institutions in disaster areas (loans that are made against pooled eligible collateral by way of open market operations within the maximum amount determined by the Bank at a fixed rate determined by the Bank in advance).
