

**Addition to the Auction Schedule  
of Outright Purchases of Japanese Government Bonds**

The Bank of Japan will conduct an additional outright purchase of Japanese government bonds (JGBs) on October 4, 2023 as follows.

	Residual maturity	Purchase size
JGBs with coupons (excluding inflation-indexed bonds and floating-rate bonds)	More than 5 years and up to 10 years	Notified when conducting the operations

The Bank will make nimble responses by, for example, conducting additional outright purchases of JGBs and the Funds-Supplying Operations against Pooled Collateral, taking account of market conditions.
