I. Introduction

The Bank of Japan, through public relations activities conducted at its Head Office and branches, has been seeking to determine the concerns of a broad cross-section of the general public relative to its policy and operations. An example of such action is the Bank's *Opinion Survey on the General Public's Views and Behavior*, conducted since 1993 using a sample of individuals nationwide who are at least 20 years of age. This survey is essentially an opinion poll designed to gain insight into the public's perceptions and actions, and therefore differs in character from the Bank's *Tankan* (Short-Term Economic Survey of Enterprises in Japan), which is conducted separately from this survey.

II. Survey Outline

Survey period	From November 9 to December 5, 2023
Sample size	4,000 people (2,061 people [i.e., 51.5 percent of the overall sample size] provided valid responses to questions)
Population of the survey	Individuals living in Japan who are at least 20 years of age
Sampling method	Stratified two-stage random sampling method
Survey methodology	Mail survey method ¹ (responses collected by mail or via the internet)

Note: 1. The survey is conducted in Japanese.
