Standardization of the Format of Source Data for Average Contract Interest Rates on Loans and Discounts

In line with [the Statistical Treatment of Source Data for Average Contract Interest Rates on Loans and Discounts](#), released on October 1, 2020, the format of data obtained from financial institutions has been standardized so that all data will reflect interest subsidies relevant to government loan programs obtained from local governments. Accordingly, almost all the figures for May 2020 and onward have been retroactively revised.

The revised data are available in "BOJ Time-Series Data Search."
