**I. Current Economic Crisis and Monetary Policy Responses**

**Chart 3**

**The Bank's Measures in Response to COVID-19 (Time Series)**

**Support for Corporate Financing**

*<Special Program>*

- Increased the amount of purchases of CP and corporate bonds (Upper limit: +2 tril. yen, Total: about 7.4 tril. yen)
- Enhanced the U.S. dollar funds-supplying operations (Unlimited)
- Provided yen funds through active purchases of JGBs
- Doubled the annual pace of purchases of ETFs and J-REITs (ETFs: 12 tril. yen, J-REITs: 180 bil. yen)

**Providing Yen and Foreign Currency Funds to Stabilize Financial Markets**

- Introduced Special Funds-Supplying Operations to Facilitate Financing
- Increased the amount of purchases of CP and corporate bonds
- Increased the number of eligible counterparties
- Applied a positive interest rate of 0.1 percent

**Active Purchases of ETFs and J-REITs**

- Further increased the amount of purchases (Total: 20 tril. yen)
- Further active purchases
- Removed the indicative figure of 80 tril. yen, unlimited

**March 16 MPM**

- Declaration of a state of emergency by the government (nationwide, April 16)

**April 27 MPM**

- The Diet’s approval of the budget related to the government’s emergency economic measures (the first supplementary budget, April 30)

**May 22 Unscheduled MPM**

- Statement by Deputy Prime Minister Aso and Governor Kuroda (May 22)
The Bank's Measures in Response to COVID-19

Support for Corporate Financing

**Special Program to Support Financing in Response to COVID-19:**
- total size of about 120 tril. yen + α
  - Purchases of CP and corporate bonds: amount outstanding of about 20 tril. yen at maximum (previously amount outstanding of about 5 tril. yen)

**Special Funds-Supplying Operations to Facilitate Financing in Response to COVID-19:** about 100 tril. yen
  - Provide funds to private financial institutions on favorable terms for the loans that they make in response to COVID-19.
  - Eligible loans include effectively interest-free and unsecured loans to small and medium-sized firms through private financial institutions for which the government takes the credit risk.

Providing Yen and Foreign Currency Funds to Stabilize Financial Markets

**Further active purchases of JGBs and T-Bills:** unlimited

**Strengthening of the U.S. dollar funds-supplying operations:** unlimited
  - In line with a coordinated action by six central banks, the Bank's operation was enhanced by lowering the loan rate, offering U.S. dollars with longer maturities, and increasing the frequency of the provision.

Active Purchases of ETFs and J-REITs

**ETFs:** annual pace of about 6 tril. yen
  - annual pace with the upper limit of about 12 tril. yen (for the time being)

**J-REITs:** annual pace of about 90 bil. yen
  - annual pace with the upper limit of about 180 bil. yen (for the time being)

---

Global Financial Markets

**Stock Price Volatility**
- United States
- Japan
  - Higher volatility in stock prices

**Dollar Funding Premiums through Foreign Exchange Swaps**
  - Increase in funding costs

**Foreign Exchange**
- yen/U.S. dollar, yen/euro

Notes:
2. In the left-hand chart, figures for the United States are the VIX Index and those for Japan are the Nikkei 225 Volatility Index.
3. As for the middle chart, figures are calculated as U.S. dollar funding rate from yen minus 3-months dollar LIBOR.

Risk Factors

- Risks are skewed to the downside, mainly due to the impact of COVID-19
  - Impact of COVID-19 on domestic and overseas economies
  - Developments in the financial system
    - From liquidity to solvency
  - Firms' and households' medium- to long-term growth expectations
  - Other various risks (intensifying tension between U.S. and China, geopolitical risks, protectionist moves, natural disasters, etc.)

Notes:
1. These figures show the forecasts of the majority of the Policy Board members and those in brackets indicate the medians. The forecasts are constructed as follows: each Policy Board member's forecast takes the form of a point estimate — namely, the figure to which she or he attaches the highest probability of realization. These forecasts are then shown as a range, with the highest figure and the lowest figure excluded. In the April Outlook Report, each Policy Board member made their forecasts as a range and submitted two figures within the range of 1.0 percentage point at most. Thus, it should be noted that the definition of the forecasts is different between the figures presented in the April and July Outlook Report.
2. The direct effects of the October 2019 consumption tax hike on the CPI for fiscal 2020 are estimated to be 0.5 percentage point. Those of policies concerning the provision of free education on the CPI for fiscal 2020 are estimated to be around minus 0.4 percentage point.
