

## Statement on Monetary Policy

1. At the Monetary Policy Meeting held today, the Policy Board of the Bank of Japan decided, by a unanimous vote, to set the following guideline for money market operations for the intermeeting period:

The Bank of Japan will conduct money market operations so that the monetary base will increase at an annual pace of about 60-70 trillion yen.

2. With regard to the asset purchases, the Bank will continue with the following guidelines:
  - a) The Bank will purchase Japanese government bonds (JGBs) so that their amount outstanding will increase at an annual pace of about 50 trillion yen, and the average remaining maturity of the Bank's JGB purchases will be about seven years.
  - b) The Bank will purchase exchange-traded funds (ETFs) and Japan real estate investment trusts (J-REITs) so that their amounts outstanding will increase at an annual pace of about 1 trillion yen and about 30 billion yen respectively.
  - c) As for CP and corporate bonds, the Bank will maintain their amounts outstanding at about 2.2 trillion yen and about 3.2 trillion yen respectively.
3. Japan's economy has continued to recover moderately as a trend, although the subsequent decline in demand following the front-loaded increase prior to the consumption tax hike has been observed. Overseas economies -- mainly advanced economies -- have been recovering, albeit with a lackluster performance still seen in part. Exports have recently leveled off more or less. Business fixed investment has increased moderately as corporate profits have improved. Public investment has more or less leveled off at a high level. Private consumption and housing investment have remained resilient as a trend with improvement in the employment and income situation, although the subsequent decline in demand following the front-loaded increase has recently been observed. Industrial production has continued to increase moderately as a trend, albeit with some fluctuations. Business sentiment has generally stayed at a favorable level, although the effects of the subsequent decline in demand following the front-loaded increase have been observed. Meanwhile, financial conditions

are accommodative. On the price front, the year-on-year rate of increase in the consumer price index (CPI, all items less fresh food), excluding the direct effects of the consumption tax hike, is around 1¼ percent. Inflation expectations appear to be rising on the whole.

4. With regard to the outlook, Japan's economy is expected to continue its moderate recovery trend, and the effects of the subsequent decline in demand following the front-loaded increase prior to the consumption tax hike are expected to wane gradually. The year-on-year rate of increase in the CPI is likely to be around 1¼ percent for some time.
5. Compared with the forecasts presented in the April 2014 *Outlook for Economic Activity and Prices*, the growth rate and year-on-year rate of increase in the CPI will likely be broadly in line with the April forecasts.
6. Risks to the outlook include developments in the emerging and commodity-exporting economies, the prospects for the European debt problem, and the pace of recovery in the U.S. economy.
7. Quantitative and qualitative monetary easing (QQE) has been exerting its intended effects, and the Bank will continue with the QQE, aiming to achieve the price stability target of 2 percent, as long as it is necessary for maintaining that target in a stable manner. It will examine both upside and downside risks to economic activity and prices, and make adjustments as appropriate.<sup>[Note]</sup>

---

<sup>[Note]</sup> Mr. T. Kiuchi proposed that the Bank will aim to achieve the price stability target of 2 percent in the medium to long term and designate the QQE as an intensive measure with a time frame of about two years. The proposal was defeated by an 8-1 majority vote. Voting for the proposal: Mr. T. Kiuchi. Voting against the proposal: Mr. H. Kuroda, Mr. K. Iwata, Mr. H. Nakaso, Mr. R. Miyao, Mr. Y. Morimoto, Ms. S. Shirai, Mr. K. Ishida, and Mr. T. Sato.

### Forecasts of the Majority of Policy Board Members

y/y % chg.

	Real GDP	CPI (all items less fresh food)	Excluding the effects of the consumption tax hikes
Fiscal 2014	+0.6 to +1.3 [+1.0]	+3.2 to +3.5 [+3.3]	+1.2 to +1.5 [+1.3]
Forecasts made in April 2014	+0.8 to +1.3 [+1.1]	+3.0 to +3.5 [+3.3]	+1.0 to +1.5 [+1.3]
Fiscal 2015	+1.2 to +1.6 [+1.5]	+1.9 to +2.8 [+2.6]	+1.2 to +2.1 [+1.9]
Forecasts made in April 2014	+1.2 to +1.5 [+1.5]	+1.9 to +2.8 [+2.6]	+1.2 to +2.1 [+1.9]
Fiscal 2016	+1.0 to +1.5 [+1.3]	+2.0 to +3.0 [+2.8]	+1.3 to +2.3 [+2.1]
Forecasts made in April 2014	+1.0 to +1.5 [+1.3]	+2.0 to +3.0 [+2.8]	+1.3 to +2.3 [+2.1]

Notes: 1. Figures in brackets indicate the median of the Policy Board members' forecasts (point estimates).

- The forecasts of the majority of the Policy Board members are constructed as follows: each Policy Board member's forecast takes the form of a point estimate -- namely, the figure to which he or she attaches the highest probability of realization. These forecasts are then shown as a range, with the highest figure and the lowest figure excluded. The range does not indicate the forecast errors.
- Individual Policy Board members make their forecasts assuming the effects of past policy decisions and with reference to views incorporated in financial markets regarding future policy.
- The consumption tax hike in April 2014 -- to 8 percent -- and the one scheduled for October 2015 -- to 10 percent -- are incorporated in the forecasts. In terms of the outlook for the CPI, individual Policy Board members make their forecasts based on figures excluding the direct effects of the consumption tax hikes.
- The forecasts for the CPI that incorporate the direct effects of the consumption tax hikes are constructed as follows. First, the contribution to prices from each tax hike is mechanically computed on the assumption that the tax increase will be fully passed on for all taxable items. The CPI will be pushed up by 2.0 percentage points for fiscal 2014 and by 0.7 percentage point for fiscal 2015 and fiscal 2016, respectively. Second, these figures are added to the forecasts made by the Policy Board members.
- The ranges shown below include the forecasts of all Policy Board members.

y/y % chg.

	Real GDP	CPI (all items less fresh food)	Excluding the effects of the consumption tax hikes
Fiscal 2014	+0.5 to +1.3	+3.0 to +3.7	+1.0 to +1.7
Forecasts made in April 2014	+0.5 to +1.4	+2.9 to +3.7	+0.9 to +1.7
Fiscal 2015	+0.9 to +1.7	+1.7 to +2.8	+1.0 to +2.1
Forecasts made in April 2014	+1.0 to +1.8	+1.5 to +2.8	+0.8 to +2.1
Fiscal 2016	+0.7 to +1.6	+1.6 to +3.0	+0.9 to +2.3
Forecasts made in April 2014	+0.8 to +1.6	+1.4 to +3.0	+0.7 to +2.3

## Forecast Distribution Charts of Policy Board Members

### (1) Real GDP

### (2) CPI (All Items Less Fresh Food)

Notes: 1. Based on the aggregated probability distributions (i.e., the Risk Balance Charts) compiled from the distributions of individual Policy Board members, the Forecast Distribution Charts are compiled as follows. First, upper and lower 10 percentiles of the aggregated distributions are trimmed and second, colors indicated below are used to show the respective percentiles of those distributions.

Upper 40% to lower 40%	Upper 30 to 40% & lower 30 to 40%	Upper 20 to 30% & lower 20 to 30%	Upper 10 to 20% & lower 10 to 20%
------------------------	-----------------------------------	-----------------------------------	-----------------------------------

- For the process of compilation of the Risk Balance Charts, see the box on page 9 of the April 2008 *Outlook for Economic Activity and Prices*.
- The circles in the bar charts indicate the median of the Policy Board members' forecasts (point estimates). The vertical lines in the bar charts indicate the range of the forecasts of the majority of Policy Board members.
- The forecast for the CPI excludes the direct effects of the scheduled consumption tax hikes.
