

# Universal Design -- Improved Identifiability

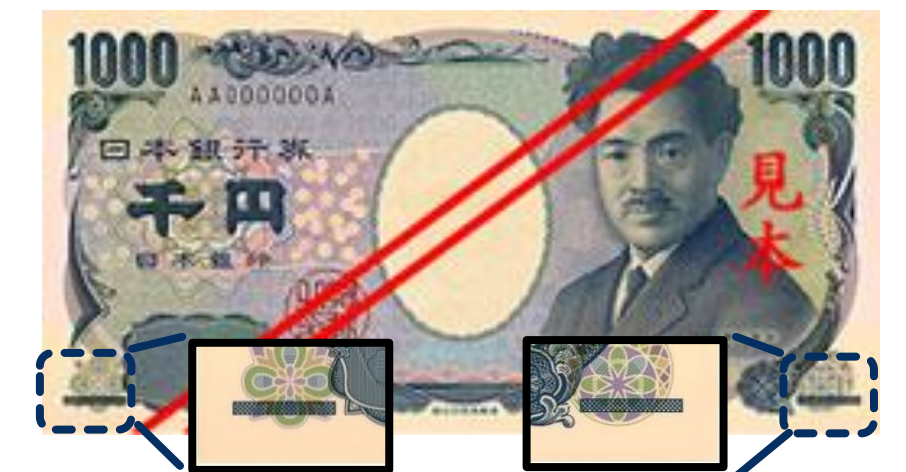

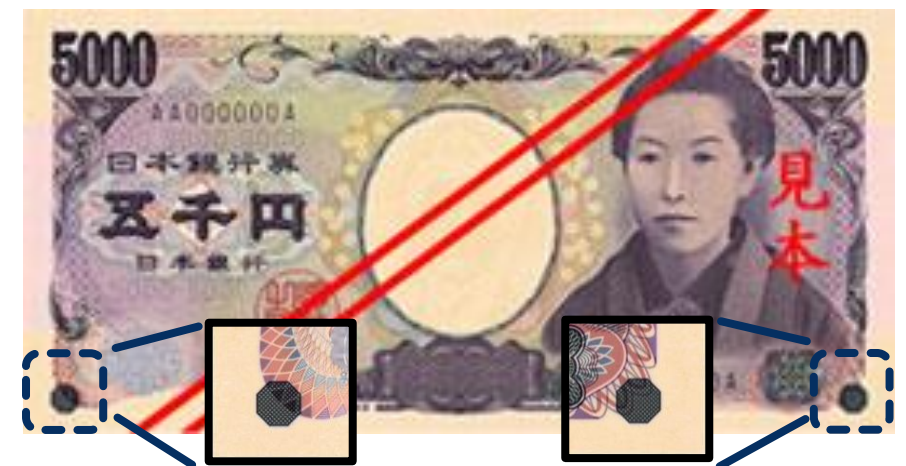

## Check with Your Fingers

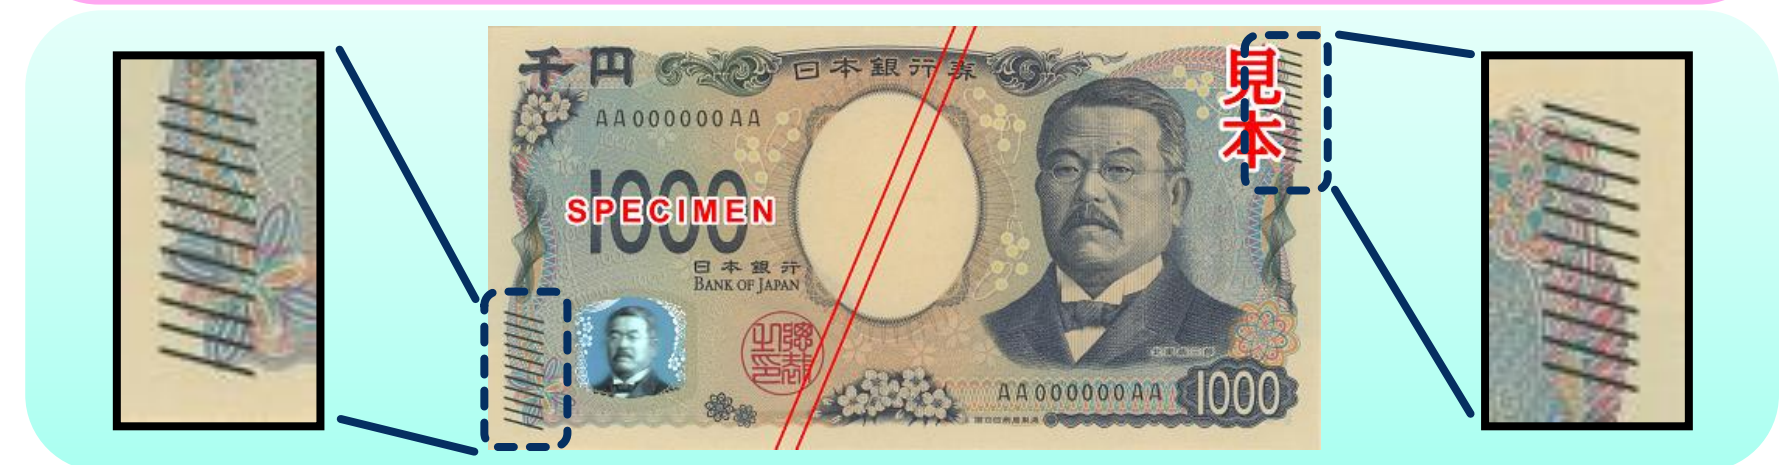

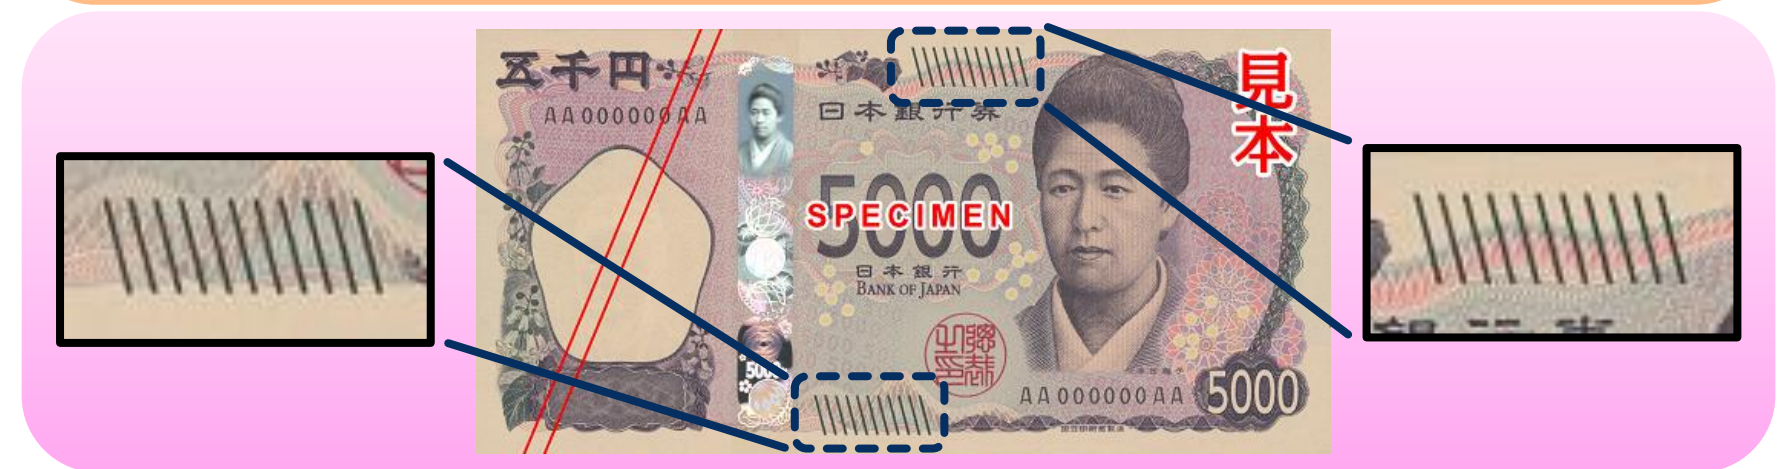

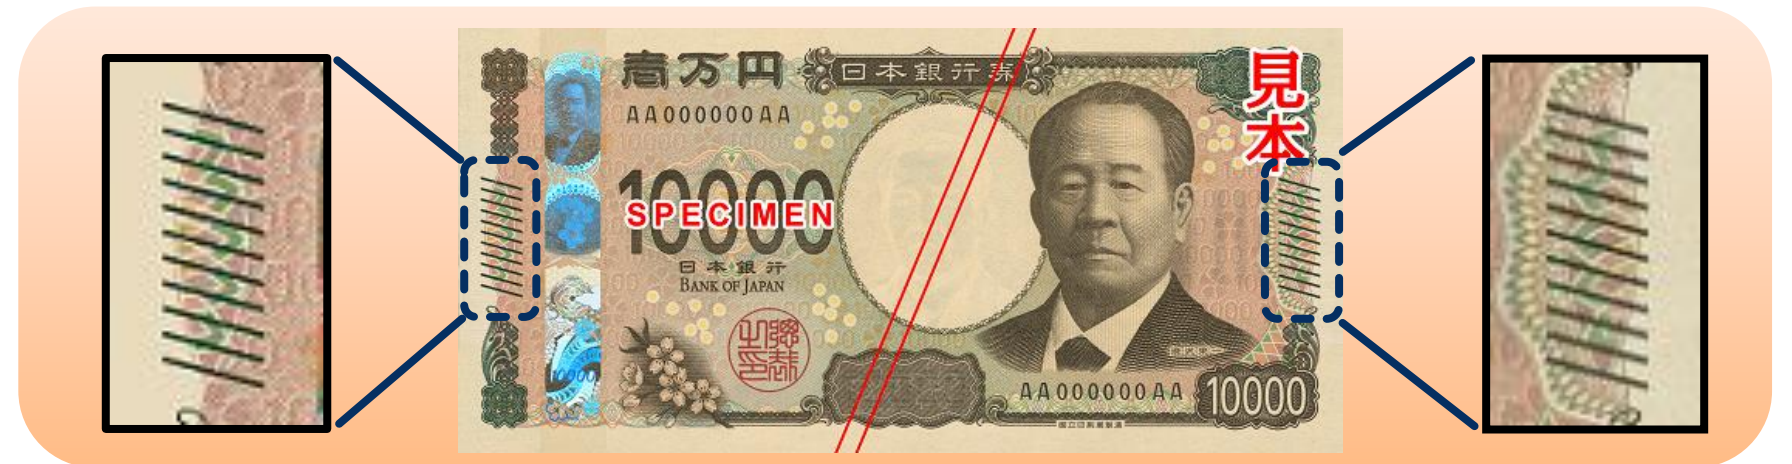

### Tactile Marks

Tactile marks help to identify the denomination by touch. To further facilitate identification, the new Bank of Japan notes have marks comprising eleven diagonal lines of the same shape and size in different positions, depending on the denomination.

## 👁️ Check with Your Eyes

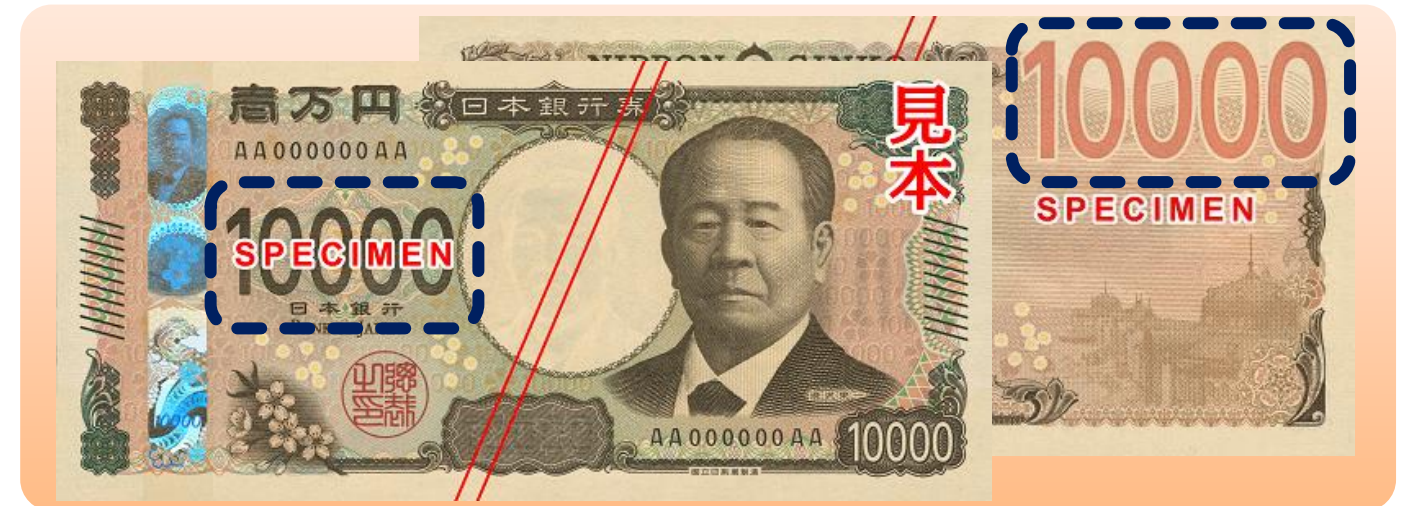

### Enlarged Numerals Indicating Face Value

To enable easier identification of the denomination, the new Bank of Japan notes have enlarged Arabic numerals indicating the face value on the front and back of the notes.
