Changes in Items in "Sources of Changes in Current Account Balances at the Bank of Japan and Market Operations (Final Figures)"

The Bank of Japan will change the format of "Sources of Changes in Current Account Balances at the Bank of Japan and Market Operations (Final Figures)" that it releases monthly and discontinue updating the relevant time-series data.

This reflects the full repayment made on loans based on the "Principal Terms and Conditions for the Funds-Supplying Operation to Support Financial Institutions in Disaster Areas" and the "Principal Terms and Conditions for the Funds-Supplying Operation to Support Financial Institutions in Disaster Areas of the 2016 Kumamoto Earthquake," which were both abolished on June 30, 2020. The amounts outstanding of the loans now stand at zero, therefore the items relevant to them will be deleted from the data of the BOJ's statistics.

The details of the changes are as follows.

1. Monthly data (final figures)

"Funds-supplying operation to support financial institutions in disaster areas (abolished)" and "Funds-supplying operation to support financial institutions in disaster areas of the Kumamoto Earthquake (abolished)" (hereafter the "items of the abolished operations") will be deleted from "BOJ Loans and Market Operations (excluding the Loan Support Program)" and "Amount outstanding" in "Sources of Changes in Current Account Balances at the Bank of Japan and Market Operations (Final Figures)."

Note: The items of the abolished operations will be deleted, beginning with the data for July 2022, when the data for "Previous year" become unavailable. However, the items of the abolished operations will be released in the data for March 2023, which include the data for entire fiscal 2021.

Please refer to the attachment for the new release format.

2. Time-series data

Updates on the data of the items of the abolished operations in "BOJ Loans and Market

Operations" and "Amount outstanding," under "Sources of Changes in Current Account Balances at the Bank of Japan and Market Operations (Final Figures)," will be discontinued.

Note: The items of the abolished operations will no longer be updated from the data for July 2021.

Notes:

1. Negative figures represent a net increase in banknotes in circulation.
2. Negative figures represent a net receipt of treasury funds and others.
3. Negative figures represent a shortage of funds in money markets.
4. For the amount outstanding of outright purchases of JGBs, see the "Monetary Base and the Bank of Japan's Transactions."
5. Based on the Principal Terms and Conditions abolished on June 30, 2020.
56. "Loans" in this chart means the loans under Complementary Lending Facility.
67. Figures do not include loans disbursed pursuant to "Special Rules for the U.S. Dollar Lending Arrangement to Enhance the Fund-Provisioning Measure to Support Strengthening the Foundations for Economic Growth."
78. The amount outstanding of market operations such as outright purchases and sales is the accumulated amount minus the amount redeemed at maturity or disposed of.
89. The amount of T-Bills that were acquired from financial institutions through the Bank's outright purchase/sale operations and are redeemed during this month is ●●● billion yen (estimated to be approximately ●●● billion yen for the next month).
The amount of redemption of T-Bills before maturity and sales of T-Bills to the government is not taken into account.
940. Of which, the amount outstanding of ETFs composed of stocks issued by firms that are proactively investing in physical and human capital at the end of this month is ●●● billion yen.
- 10+11. The amount outstanding of U.S. dollar-denominated loans based on "Principal Terms and Conditions for U.S. Dollar Funds-Supplying Operations against Pooled Collateral."
- 11+12. The amount outstanding of U.S. dollar-denominated loans based on "Special Rules for the U.S. Dollar Lending Arrangement to Enhance the Fund-Provisioning Measure to Support Strengthening the Foundations for Economic Growth."
